point

1.

Which of the following statements is true regarding subqueries?

Subqueries always process the innermost query first and the work outward.

Correct

See the videos on subqueries in the module for more information.

Subqueries will process whichever query you indicate for them to process first.

Subqueries always process the outermost query first and the work inward.

0 / 1
point

2.

If you can accomplish the same outcome with a join or a subquery, which one should you always choose?

A subquery because they are always faster

Joins are usually faster, but subqueries can be more reliable, so it depends on your situation.

Whichever one you understand better and can write faster.

A join because they are always faster

This should not be selected

See the videos on subqueries in the module for more information.

3. Module 3 Quiz

Quiz, 10 questions

- ☐ Full Outer Join
- ☐ Right Join
- ☐ Left Join
- ☒ Inner Join

Correct

See the videos entitled, "Inner Joins" and "Advanced Joins" for more information.

1 / 1
point

4.

Select which of the following statements are true regarding inner joins. (Select all that apply)

☐

Inner joins retrieve all matching and nonmatching rows from a table

Un-selected is correct

☐

Performance will most likely worsen with the more joins you make

Correct

See the video entitled, "Inner Joins" for more information.

☐

There is no limit to the number of table you can join with an inner join.

Correct

See the video entitled, "Inner Joins" for more information.

☐

Module 3 Quiz

Quiz, 10 questions

Correct

See the video entitled, "Inner Joins" for more information.

0.67 / 1
point

5.

Which of the following is true regarding Aliases? (Select all that apply.)

☒

An alias only exists for the duration of the query.

**Correct**

See the video entitled, "Aliases and Self Joins" for more information.

☐

SQL aliases are used to give a table, or a column in a table, a temporary name.

**This should be selected**☒

Aliases are often used to make column names more readable.

**Correct**

See the video entitled, "Aliases and Self Joins" for more information.

point

6.

What is wrong with the following query?

```
1 SELECT Customers.CustomerName, Orders.OrderID
2 FROM LEFT JOIN ON Customers.CustomerID = Orders.CustomerID FROM Orders AND
   Customers
3 ORDER BY
4 CustomerName;
5
```

☐

Should be using an inner join rather than a left join

☐

Column names do not have an alias

Module 3 Quiz

Quiz, 10 questions

Correct

See the videos entitled, "Inner Joins" and "Advanced Joins" for more information.

1 / 1
point

7.

What is the difference between a left join and a right join?

- ☐ A left join always is used before a right join in a query statement
- ☐ There is actually no difference between a left and a right join.
- ☒ The only difference between a left and right join is the order in which the tables are relating.

Correct

See the video entitled, "Advanced Joins: Left, Right, and Full Outer Joins" for more information.

- ☐ A right join is always used *before* a full outer join, whereas a left join is always used *after* a full outer join

point

8.

If you perform a cartesian join on a table with 10 rows and a table with 20 rows, how many rows will there be in the output table?

- ☐ 20
- ☒ 200

Correct

See the video entitled, "Cartesian (Cross) Joins" for more information.

- ☐ 15
 - ☐ 10
-

Module 3 Quiz

Quiz, 10 questions

9.

Which of the following statements about Unions is true? (select all that apply)

Each SELECT statement within UNION must have the same number of columns

Correct

See the video entitled, "Unions" for more information.

The UNION operator is used to combine the result-set of two or more SELECT statements

Correct

See the video entitled, "Unions" for more information.

The order of the SELECTed columns in a UNION does not matter

Un-selected is correct

The columns must also have similar data types

Correct

See the video entitled, "Unions" for more information.

0 / 1
point

10.

Data scientists need to use joins in order to: (select the best answer)

Filter data from multiple tables.

This should not be selected

See any of the videos on Joins in this module for more information.

Create new tables.

Retrieve data from multiple tables.
