## **Practice Simple Select Queries**

Practice Quiz, 10 questions

Next Item

1/1 point

1.

To prepare for the graded coding quiz, you will be asked to execute a query, read the results, and select the correct answer you found in the results. This question is for you to practice executing queries. I have provided you the script for this query, a simple select statement. Think of this as a sandbox for you to practice. As you practice executing queries, take time to read the results in order to prepare for the quiz and get comfortable writing a basic select statement.

Run query: Retrieve all the data from the <u>tracks</u> table. Who is the composer for track 18?

1 2 3	Run
	Reset

AC/DC		
		//

Your answer cannot be more than 10000 characters.

Thank you for your response.

AC/DC is the composer for track 18.

A simple select statement is the foundation to almost all queries. You should be able to write this in your sleep. The only way to get comfortable writing these statements is practice writing them until it comes naturally.

Practice Simple Selectoring viies Sou will be asked to execute a query, read the results, and select Practice Revisiver you found in the results. This question is for you to practice executing queries. I have provided you the script for this query, a simple select statement. Think of this as a sandbox for you to practice. As you practice executing queries, take time to read the results in order to prepare for the quiz and get comfortable writing a basic select statement.

**Run Query:** Retrieve all data from the <u>artists</u> table. Look at the list of artists, how many artists are you familiar with (there is no wrong answer here)?

1 2	Run
	Reset
25	
	,
	//

Your answer cannot be more than 10000 characters.

#### Thank you for your response.

There are no incorrect answers to this question as it is subjective to you. Again, this is a simple select statement to help you obtain information from a set of data. They are the foundation to almost all queries. You should be able to write this in your sleep. The only way to get comfortable writing these statements is practice writing them until it comes naturally.

To prepare for the graded coding quiz, you will be asked to execute a query, read the results, and select the correct answer you found in the results. This question is for you to practice executing queries. I have provided you the script for this query, a simple select statement. Think of this as a sandbox for you to practice. As you practice executing queries, take time to read the results in order to prepare for the quiz and get comfortable writing a basic select statement.

**Run Query:** Select all the columns from the Media Types table and limit the results to 50 records. What happened when you ran this query? Were you able to get all 50 records?

1 2 3	Select * From Media_types Limit 50;	Run Reset

Request error logged. Please try again later. No	

Your answer cannot be more than 10000 characters.

#### Thank you for your response.

Unfortunately, Coursera's code block feature limits queries to 25 lines because of server storage capacity. However, regardless of this feature it is important for you to note that 50 records would have likely been showing in a normal SQL query with a limit in the code line as seen above. So as you work through the exercises of this course, please keep this in mind.

Run Query: Select all the columns from the Albums table and limit the results to 5 records. How many Praction Sample Splecta Queries

Practice Quiz, 10 questions

What is the name of the 9th album in this list?

1 Select 2 From 3	t * Albums;	Run Reset

3 Columns
Plays Metallica By Four Cellos

Your answer cannot be more than 10000 characters.

### Thank you for your response.

Yes, there are only 3 columns in the albums table.

The 9th album's name is: *Plays Metallica By Four Cellos,* you should have been able to retrieve this by changing the limit number in the query. Here is how they should look:

2	Select * From Albums Limit 5;
2	Select * From Albums Limit 10;
